## **Yamaha Crypton - semiautomatic**

This semiautomatic scooter is suitable for those who are looking for small engine size, light weight and economical travelling.

Due to its larger wheels this scooter can take you to places that are otherwise much harder to access with conventional scooters. According to our customers it is a lot of fun riding the semiautomatic scooter. It is easy to use and it gives the feeling of riding a conventional motorcycle.

We offer only scooters and motorcycles of well known brands. This Yamaha Crypton has proved itself to be very reliable scooter.

Our customers use it to travel to rainbow mountain jungle and other places around Cusco.

## PLEASE READ

### **What is the difference between us and other stores?**

Firstly, I am of European background moved into Peru in 2020 and since 2021 I started a business with motorcycles.

My goal is to provide you with good quality motorcycles (mainly japanese brands) and unique self guided tours that are out of common of what you find with other agencies.

Renting with me I will create a tour for you based on your days available, create a map and suggest accommodation and places to visit along the way. During your ride I communicate with you via whatsapp 24/7.

Secondly, you come across more agencies renting motorcycles and scooters. In my first year of experience with these agencies I have seen chinese scooters such as Lifan breaking down, snapped the frame and business owners charging customers for repairs that is caused by poor quality. Please be aware of this, it might cost couple soles less but eventually you Will pay more.

For multiple rental days I always throw some extras free of charge that will make your ride more convenient. Your luggages can be stored safely in our store while you ride.

Please come and visit me in the office to check what is available
